Club Master

Club Master is a standalone, Windows based program with a very simple interface. This makes it very easy to use for everyone, computer literate or not.

The software uses a very simple, SQL based set of tables which are pulled together by a data dictionary in the program. This makes it easy to install and very robust in use. It does not require anyone with any database knowledge and may be simply backed up and restored on another computer using built in routines.

It may be backed up onto a cloud based storage, such as Dropbox, meaning that other users can restore the data on their computer immediately after changes have been made. Our licencing method involves embedding the club name in the software and this means that it can be installed on as many computers as required.

The software provides three databases: the main members database, an ex members database and a waiting list database. (the latter two are not available in the Lite version). Members may be simply moved between the databases as required.

The software provides for up to 40 member types. The standard version of Club Master provides for annual membership but a version is available with eight renewal periods such as daily, weekly, monthly, etc. There are also four additional payments which can be used for extra charges such as car park, donations, etc.

Payment is made through a simple Fee Payment form and payments are recorded in the Fee Daybook with daily totals and report total. Member Payment History is also recorded and may be reported on.

Overdue members are very quickly identified and, if Club Master eMailer is installed, they can be emailed a reminder.

We use Crystal Reports as our reporting tool and all reports are exportable to Excel, Word, PDF, etc.

Our export routines allow data to be selectively exported to be used in mailmerging with word processing. The Export All option has an Excel button which will open the full database export in Microsoft Excel (version independent).

All in all a very easy to use program which provides routines for all the tasks which a membership secretary has to perform!

Software which simply works!

Club Master eMailer

This is a standalone addition to our Club Master software and provides the facility to email members directly from the members database. All the standard Club Master filtering may be used to select the required members.

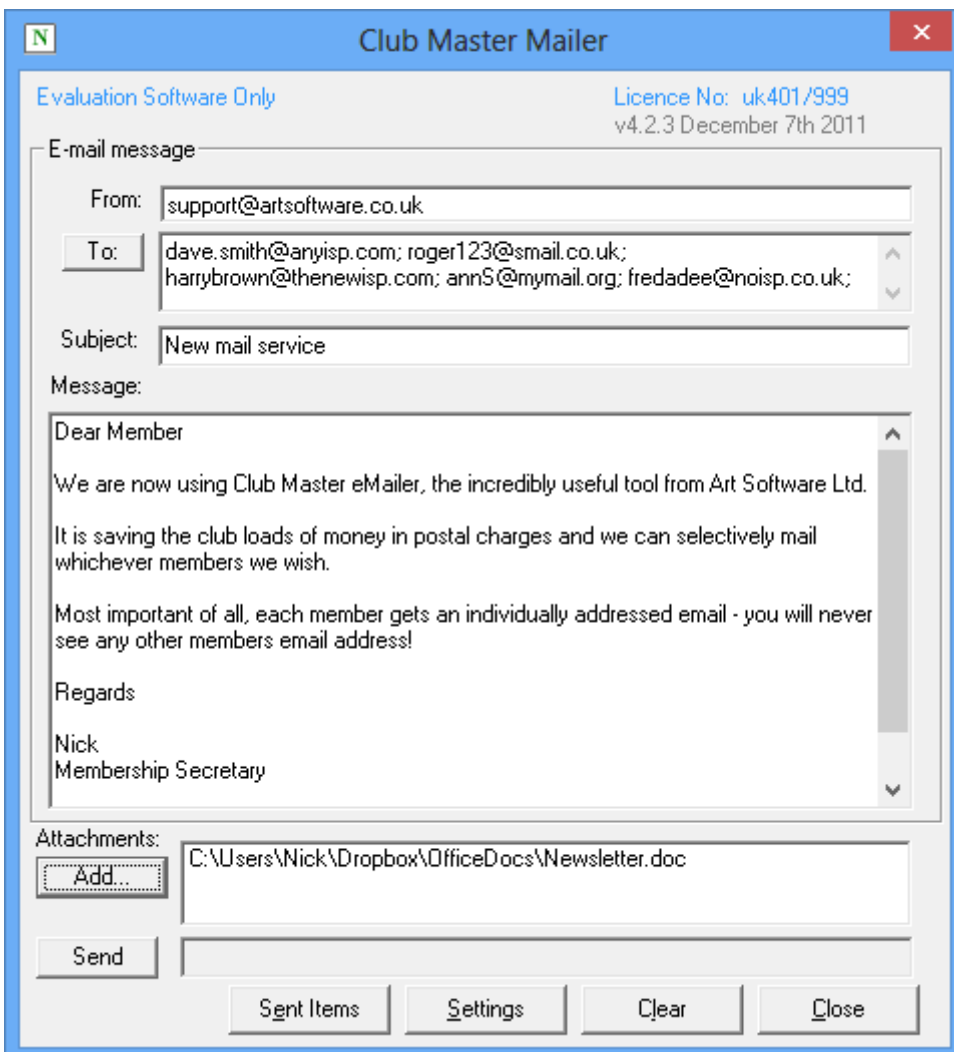

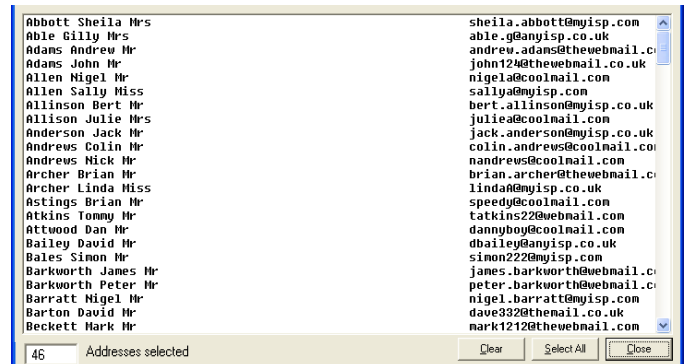

It is important to stress that each member receives an individually addressed email and does not see the addresses of the other members in the email.

Just set up your email settings (check these in Outlook or any other email client). Click the To button and all Club Master records which have an email address will be displayed.

You can select all or individually select the members who you want to mail.

You can also select all and then deselect members who you do not wish to include.

You can select blocks of members and the number selected is shown in the box at the bottom left of the form.

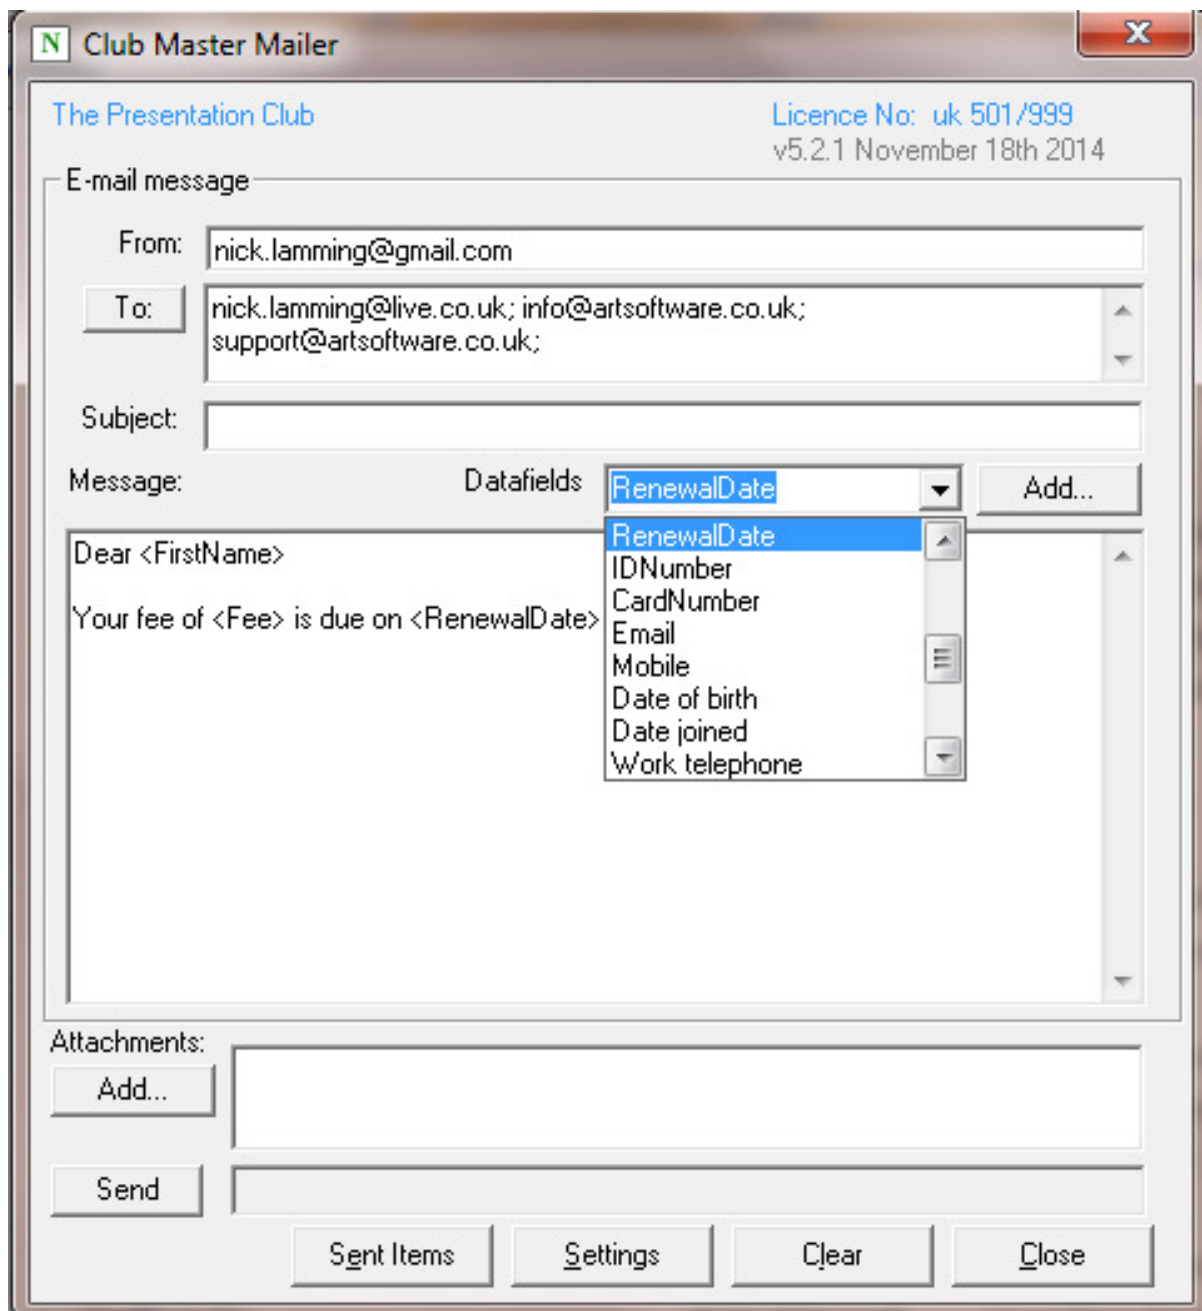

You may wish to use the Club Master three level filters to select just the members you wish to mail.

Close the email list and type your email. Add any attachments, click Send and the message line next to the send button will confirm that your mail has been sent successfully.

Club Master eMailer is included in our Full Support configuration and costs £15 + VAT to add to any of our Online Support versions.

Personalising the email

Club Mail 5 allows you to add fields from the member's record to each email.

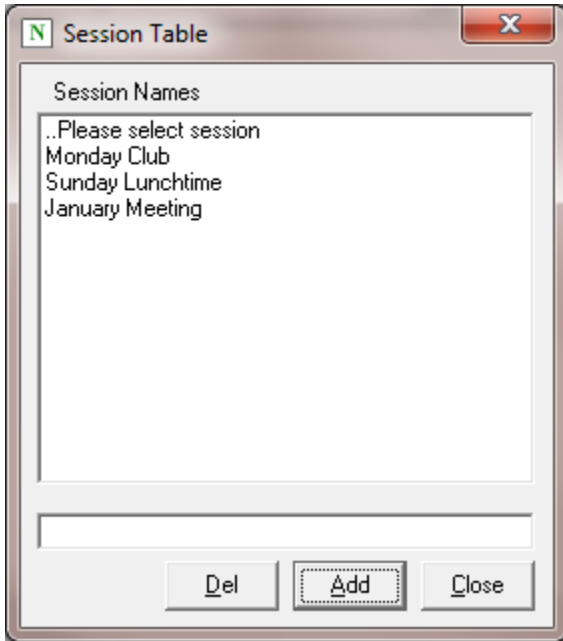

The screenshot shows the 'Club Master Mailer' application window. The title bar reads 'N Club Master Mailer'. The main window has a header area with 'The Presentation Club' on the left and 'Licence No: uk 501/999 v5.2.1 November 18th 2014' on the right. Below the header is an 'E-mail message' section. It contains fields for 'From:' (nick.lamming@gmail.com), 'To:' (nick.lamming@live.co.uk; info@artsoftware.co.uk; support@artsoftware.co.uk), and 'Subject:'. The 'Message:' field contains the text 'Dear <FirstName>' and 'Your fee of <Fee> is due on <RenewalDate>'. To the right of the message field is a 'Datafields' list with a dropdown menu currently showing 'RenewalDate'. The list includes: RenewalDate, IDNumber, CardNumber, Email, Mobile, Date of birth, Date joined, and Work telephone. There is an 'Add...' button next to the dropdown. Below the message field is an 'Attachments:' section with an 'Add...' button. At the bottom of the window are four buttons: 'Sent Items', 'Settings', 'Clear', and 'Close'.

Just select the required field from the list and Add it to the email.

Totally personalised emails from Club Mail 5!

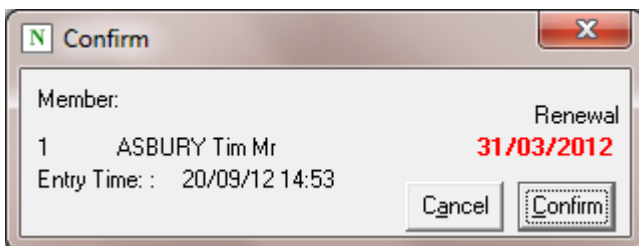

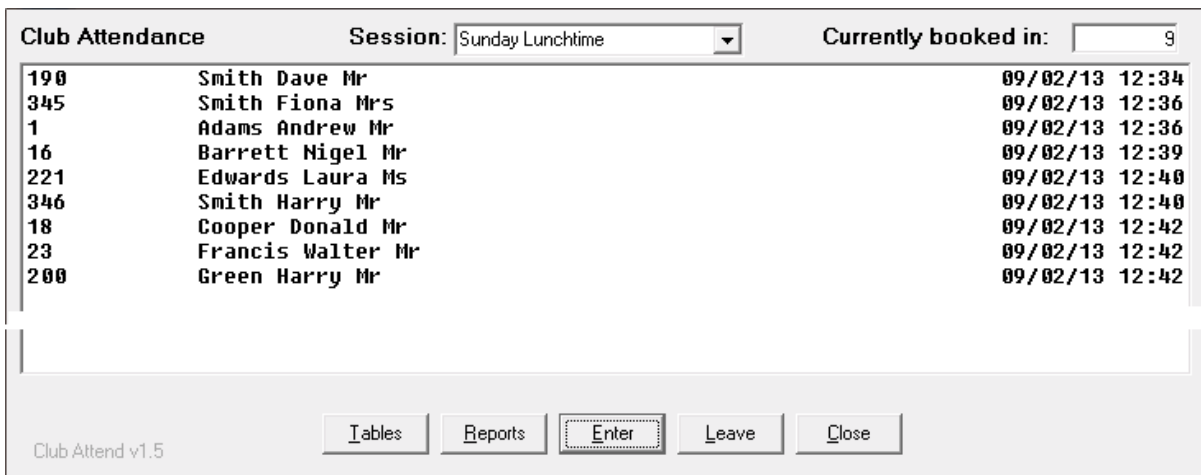

The Club Master Attendance system

Firstly the sessions need to be setup

Select a session from the drop down list and you are ready to start entering members.

When you click the Enter button, find the member in the usual way and then confirm that you are booking them in.

The member details and renewal date are displayed. If the renewal date is overdue it will be displayed in red.

A card reader (barcode, magnetic stripe or proximity) may be used with this system to automatically capture the member details.

The Club Master Attendance system

Reports

The screenshot shows a software interface for generating reports. It features two input fields labeled 'From:' and 'To:'. Below these are two buttons: 'Usage by session type' (highlighted with a dashed border) and 'Usage by Member ID'. At the bottom left, there is a 'Member No:' label followed by an input field. A 'Close' button is located at the bottom right.

Club Accounts

Accounting Software for Clubs

Club Accounts is a very simple income and expenditure recording system designed specifically for member only clubs.

Our group has specialised in providing software for the member only club market since 1982 giving us unrivalled experience in the specific requirements of this market area.

Some features of **Club Accounts** are:

- Fully customisable financial year settings for periods, months, working weeks, etc
- Full VAT recording, if required with automatic VAT form details.
- Club specific bar takings input for up to four bars / tills
- Simple weekly input for Income and Expenditure (unlimited Income/Expenditure types)
- Main trading bank in and out transactions with automatic entry from expenditure cheque and direct debit payments. Automatic direct debit option.
- Subsidiary bank accounts for transfers to and from the trading account.
- Full reporting including profitability report available for month/period, quarter and year

Above all, **Club Accounts** is very easy to use. Each task which has to be performed in a paper based accounting system is listed on the system menus. Just select the task and let the computer do the hard work! Take a look at the demo for more details of Club Accounts features

The total Club Accounts system cost is, would you believe, discounted to just £75 + VAT and this includes a simple to follow operating manual in pdf format and even free telephone support if any difficulty is experienced during installation or in the early days of use.

To proceed, simply complete and return the enclosed response form to :

Art Software Ltd 2 Jasmine Close, Springfield, Chelmsford CM1 6XL

Note Our Club Accounts software was developed with guidance and approval from the Royal British Legion Clubs Dept.

Club Accounts

Club Accounts is a simple income and recording system designed to make life easy for club treasurers.

It was designed to replace an Excel system which had been designed by the Royal British Legion Clubs Department. They needed the simplicity of the Excel system but with the control of a purpose built program.

Club Accounts records income on a simple datagrid with a popup form to enter and edit the data. Income may be recorded against income heads such as subscriptions, raffles etc and additional heads may be loaded onto the system to personalise Club Accounts for individual organisations.

Expenditure may be recorded against expenditure heads such as staff costs, electricity, stationery, etc and further heads may be added.

If expenditure is paid for by cheque then Club Accounts will automatically add a bank transaction with full details.

When the data has been entered onto the system, reports can be run off for Income, against budget if required and Expenditure, against budget if required. Bank reports can be run together with reports listing cash entries on the system.

The Finance Report lists all income, totalled by head and all expenditure, totalled by head.

The Profit or Loss is shown at the bottom of the Finance Report together with current bank balances.

Club Accounts does not go as far as providing a Profit and Loss account or a Balance Sheet.

For those who know how to prepare these, Club Accounts provides all the details necessary.

For treasurers who hand everything over to an accountant at the end of the year, everything required is available.
